## MODEL SEWING MACHNE

From the New York Herald.] Prominent among the mechanical triumphs of this most ingenious age, common-honesty compels us to notice the Empire Sewing Machine, commended as justly styled perfection itself. Useful as have been the various sewing machines, from one of them has been cursed with some radical defect, which detracts from general utility. Wurned by the experience of his predecessors, the inventor of the Empire Machine has produced an instrument, combining all the advantages for which others are vaunted and obviating every defect which can be attributed to them by the

most fastidious critic. The Empire Macnine is a marvellous combination of simplicity, economy and perfect workmanship, being durable, free frema libility to get out of order, noiseless, and easy of operation. Its mechanical continvance is such as to secure stability. free dom from accident, and accuracy as to workmanship By the use of the patented shuttle and straight needle it makes a stitch, which can neither rip nor ravelwhile, at the same time, it can operate perfectly upon every species of material from leather to cambric, with threads of cotton, linen or silk, from the finest to the
